Team Name: sdmay24- Q-bit
Team Members: Robert Laskey, Calvin Mitchell, Ezra Manus, Andrew Wilken
Report Period: Aug 28-Sept 10

Summary of Progress in this Period

In this period we've met with our client and are currently working towards researching to gain the knowledge required. We've all read a couple papers that the client suggested, and have watched several more videos on the topic. We've made made a plan and have identified the basic principles required to build a simulator

Pending Issues

Currently, our primary goal is still research. In order to make a simulator, we need a higher level understanding of the complexities involved in the process

Plans for Upcoming Reporting Period

We plan to have answered the questions our client has asked, and to have gained a stronger understanding of the quantum mechanics involved in our project.
